Chronic obstructive pulmonary disease (COPD) is a treatable condition. Most patients have mild disease that requires little other than smoking cessation, immunizations, and as-needed short-acting bronchodilator therapy. Dear Twitpic Community - thank you for all the wonderful photos you have taken over the years. We have now placed Twitpic in an archived state. Background. As mortality rates decline, life expectancy increases, and populations age, non-fatal outcomes of diseases and injuries are becoming a larger component of the global burden of disease. The recent literature on carers' burden in mental disorders is reviewed. Families bear the major responsibility for such care. Carers face mental ill health as a direct consequence of their caring role and experience higher rates of mental ill health than the general population., Chronic Kidney Disease In Disadvantaged Populations (Enhanced Edition).
