

Download Researching Embodied Sport

Embodied cognition is the theory that many features of cognition, whether human or otherwise, are shaped by aspects of the entire body of the organism. Our Vision. Our vision is a life-affirming future for all. Our commitment is to leave the world better than we found it. We support transformative leaders and organizations that can meet the challenges of our time – delivering sustainability, interconnectedness, and social equity. The university sports programme offers a wide range of sports and is a perfect way of compensating for the pressures of day-to-day university life. Despite the steady increase in volume and quality of women's sport participation over the last century, female athletes continue to be underrepresented across all platforms of the media. A range of mechanisms have been shown to contribute to media, Researching Embodied Sport.
