Prof. Dr.-Ing. Jürgen Beyerer ist Inhaber des 2004 eingerichteten Lehrstuhls für Interaktive Echtzeitsysteme an der Fakultät für Informatik. Submissions must be original, unpublished work, and not have been submitted to another conference or journal for publication. Full papers submissions will be blind peer-reviewed by at least two experts from the International Program Committee in order to ensure high quality standards of research. Abstract. Coiled tubing is an effective tool in logging and workover applications of horizontal wells. Several operators have taken advantage of using coiled tubing to log or perforate wells which could not have been performed with conventional wireline methods. ABSTRACT Cathodic protection (CP) is a method to mitigate external corrosion on buried metallic pipelines. Electrical isolation and electrolyte homogeneity are key factors that influence the performance of the majority of pipeline CP systems., Advances In Dynamics Instrumentation And Control Proceedings Of The 2004 International Conference.
