

# Download Open Alliance In Graphs (report)

INTRODUCTION to writing a graph description For the IELTS writing test, you are required to complete two writing tasks. Task 1 is some kind of data report, while Task 2 is an essay. Using graphs in your report Use graphs to show qualitative features and gross differences in data . Graphs can show a change in one function in relation to a change in another and are usually simpler, quicker and easier to digest. In practice, an alliance can be a bond or connection between individuals, families, states, or entities, etc. Formally, a non-empty set  $S$  of vertices of a graph  $G$  is a defensive  $k$ -alliance (resp. an offensive  $k$ -alliance) if every vertex of  $S$  (resp. the boundary of  $S$ ) has at least  $k$  more neighbors inside of  $S$  than it has outside of  $S$ . Absolute Time - when selected, the generated report tables and graphs are based upon the actual start and end date and times of the profile/timer. Relative Time - when selected, the generated report tables and graphs are based upon relative time. Profiles/Timers are graphed from a shared zero point., Open Alliance In Graphs (report).
