

Download Retinitis Pigmentosa

Retinitis pigmentosa (RP) is a genetic disorder of the eyes that causes loss of vision. Symptoms include trouble seeing at night and decreased peripheral vision (side vision). Onset of symptoms is generally gradual. As peripheral vision worsens, people may experience "tunnel vision". Complete blindness is uncommon. For the past 20 years, Dr. Rosenfarb has been recovering and preserving eyesight for RP patients from across the world. Several of their stories are featured on this site. Retinitis pigmentosa (RP) Krankheitsbild. Aus der Broschüre "Retinitis Pigmentosa (RP) - Was ist das?", 6. Auflage 03/2016. Inhaltsübersicht. Einleitung Die Bezeichnung Retinopathia pigmentosa oder Retinitis pigmentosa (RP) beschreibt eine durch Vererbung oder spontane Mutation entstehende Netzhautdegeneration, bei der die Photorezeptoren zerstört werden., Retinitis Pigmentosa.
