

Download Speak Up Mini Cases In Language Answers

Author: Antoinette Miller Psychology Department Clayton State University antoinettemiller@clayton.edu

Abstract: This series of mini cases focuses on language deficits (aphasias) and their likely organic causes (problems in specific brain areas). "Speak Up!" by Antoinette R. Miller Page Case 2 – Louis Louis is a right-handed man in his mid-30s who has recently suffered from a cerebrovascular accident (CVA). This has left him with a right-sided hemiparesis (weakness) and significant language issues. In particular, Louis's right arm and hand were too weak to grasp anything. Please note: These cases focus on disruptions of spoken communication and reading. Additional disruptions of writing may also occur with damage to the brain areas associated with language (particularly Broca's area). (Contains 1 figure, 1 note, 4 resources, and 4 online resources.) Abstract. Your group will be assigned one of the patient cases from the following pages, which are based in part on actual medical cases reported in, Speak Up Mini Cases In Language Answers.
